

Munksjö

ELECTROTECHNICAL PAPER

Product

Cable paper

Paper for submarine long distance high and medium power cables.

Transformer paper insulation

Paper insulation for all kinds of transformers and accessories

- Power Transformers
- Distribution Transformers
- Instrument Transformers
- Bushings

Other industrial basepapers

Production of paper for electrical laminates, abrasive paper with lower grammage, battery paper, semi-conducting carbon-black etc.

All grades based on customer specifications or IEC Standards

Munksjö

ELECTROTECHNICAL PAPER

Cables

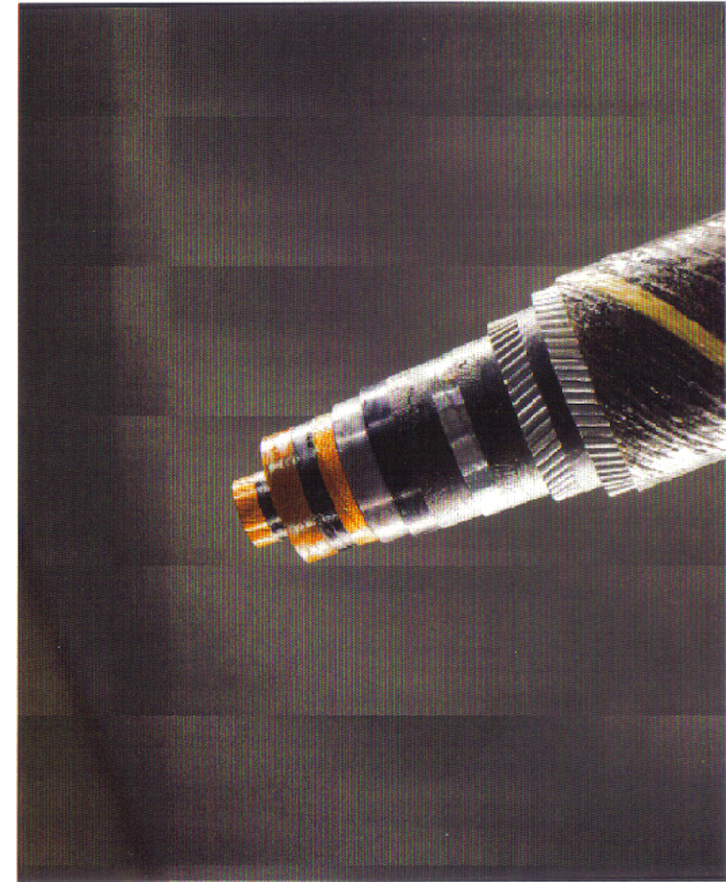

Plain paper medium and high density

For long distance submarine HVDC cables, such as BRITNED UK-Holland 260km 1000MW.

For submarine as well as land cables HVAC cables.

Semi-conducting carbon-black

For shielding.

Munksjö

ELECTROTECHNICAL PAPER

Power transformers

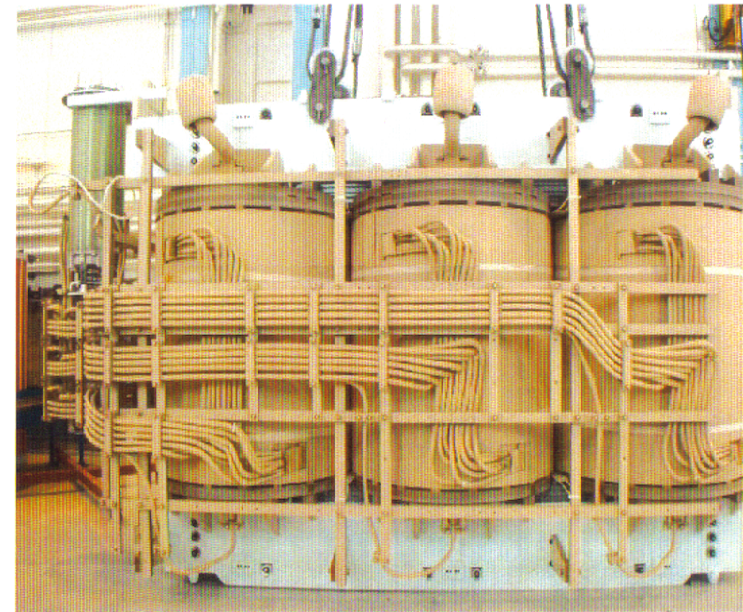

Plain paper medium and high density.

For flat and round magnet wire insulation, layer insulation and cable insulation.

Creped paper in normal or medium or high density

For flat, round and CTC magnet wire insulation.

A number of qualities can be supplied as thermally upgraded, coloured green or nature.

Munksjö

ELECTROTECHNICAL PAPER

Distribution transformers

Plain paper medium and high density

For direct use as layer insulation or as base paper for Diamond Dot Printing

Spinning paper high density

For wire insulation

Creped paper

For tube insulation

Munksjö

ELECTROTECHNICAL PAPER

Instrument transformers

Plain insulation-paper

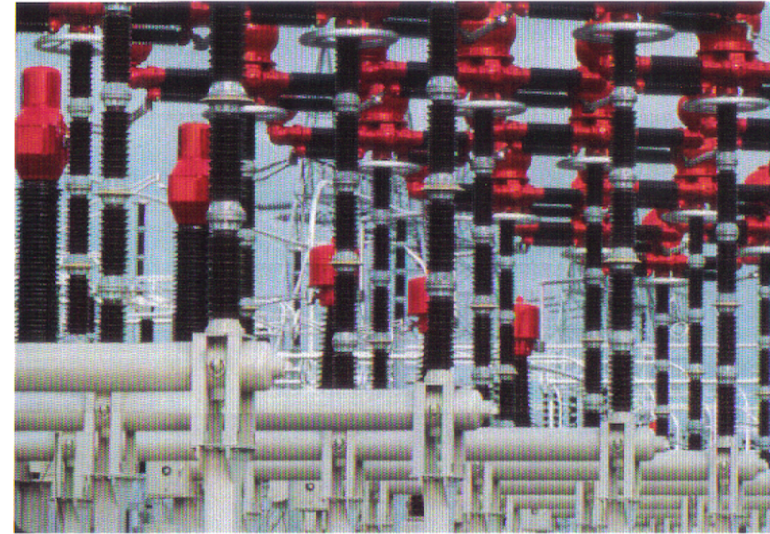

For Instrument Transformer Bushings

Creped paper

For instrument transformers head

Semi-conducting carbon-black

For shielding

Munksjö

ELECTROTECHNICAL PAPER

Bushings

Plain paper low density

For OIP Bushings.

Creped Papers

For RIP Bushings.
